why choose us?

We have successfully installed more than 400 sensory rooms throughout the world. !

Ongoing support & advice

We are close to you

Our team of expert consultants is comprised of therapists, technicians and engineers who specialize in different support technology systems. These experts will advise and guide you throughout the entire process to ensure the sensory room meets your specific requirements and adapts to the needs of your staff and users. Our network of consultants are located in various areas to ensure there is always someone close to you.

Innovation

Latest technology

The in-house R+D+i department at **BJLive!** centers on continuous research and development, which allows us to offer innovative, technologically advanced solutions that match our users' specific requirements. We are the creators of the SHX technology, a unique system designed for creating immersive multisensory environments. We are constantly developing new ideas and solutions to improve and enhance your sensory room.

We are manufacturers

Custom solutions

We develop and manufacture sensory products that are commercialized worldwide through a network of distributors. This allows us to offer our clients flexible solutions, customize every product to match specific needs, guarantee the highest quality and provide the highest standard of after-sales service and support.

Our after-sales service

Everything under control

Our technical experts and engineers specialize in hardware and software, working hard to ensure that you enjoy fast, efficient and reliable service both in the installation of your sensory room and in resolving any issues. At **BJLive!**, we are committed to providing the best possible customer experience with a flexible, customized solution.

Custom sensory rooms

A room just for you

Every room is designed and developed to meet specific aims and requirements. We can design anything from a small sensory corner for a bedroom to a larger room project for a healthcare center aimed at a range of different users. We are happy to draw up a scale plan of your sensory room free of charge so that you can see the proposed layout and understand the benefits it will offer.

Our guarantee

Backing quality

With the exception of software and batteries, all of our products carry a 2-year warranty that covers any type of manufacturing defect. During the first six months, this warranty also covers collection of the item at your premises. We also offer our clients maintenance contracts for entire sensory room.

Training

Learning together

We offer our clients a broad range of workshops and training courses to provide them with in-depth knowledge of the SHX technology and the different solutions available at **BJLive!** while allowing them to gain a greater understanding of the uses and benefits of sensory rooms in general. We also provide tailored theoretical-practical training courses to suit specific requirements, each led by an expert in the relevant field.

SCALABLE

Create your sensory room gradually!

Our sensory rooms allow you to start slowly. You can begin with a bubble tube, a pouf or some fiber optic strands and gradually add different elements to offer greater opportunities for therapeutic intervention and well-being.

When you choose to extend your resources, every element already installed in the room will continue to be useful and become part of a fully customizable interactive space with an integrated controlled system thanks to the SHX technology.

The most immersive system for multisensory rooms

The ability to coordinate the activation of the elements and effects in the room allows us integral stimulation in a fully immersive experience.

Offering stimuli in a coherent way eases understanding and aids sensory compensation in addition to providing a more holistic experience to connect with every user.

IMMERSIVE

“ With SHX, I can turn a room bright red and transport my senses to a party near the beach at the touch of a single switch. I can see and hear fireworks while I feel their vibration in my body and allow the fresh night breeze to caress my face. It's a party for your senses!

CUSTOMIZABLE

Turn the room into anything you want!

“There are so many customizing options to explain; the possibilities are endless!”

What are the user's interests?

Rock music, surfing, colored bubbles, their favorite cartoon characters, childhood memories, their football team's greatest goals, nature, stories, vibration, fireworks, rollercoasters... Our sensory rooms come with hundreds of different content options and the possibility to add more.

Imagining is creating!

What are your therapeutic goals today?

Well-being, memory work, controlling the environment, participation, sensory integration, communication, fun, personal autonomy, interaction or relaxation. It is easy to create and carry out a different activity every day based on the user's specific interests in order to reach your chosen educational or therapeutic goal.

The room adapts to you!

Personalize your room as often as you wish

Adapting the room to every user's needs and abilities is quick and easy. Integrate different environments or create new ones using images, songs or your favorite YouTube videos. You can even use your own files on a USB device or the internet.

Take control like never before!

USER-CONTROLLED

The user has full control of their environment. They are the heroes in every story and can decide how and when to change the environment while interacting with others and participating actively. The therapeutic possibilities are endless!

“ Just one movement changes everything. The control systems for every element and effect in the room can be combined into one! Activate one or more of them at the same time with the touch of a single button!

Choose how you control the room!

There are a number of different controllers available so that you can select the system that best suits every person.

(See available controllers on Page 60)

THE SHX SYSTEM

Enjoy a truly
immersive
experience!

“With SHX, I can turn the whole room blue and transport my senses to somewhere near the sea where the wind is blowing and I can feel the touch of bubbles blown in from the sea on my face while my seat vibrates to the rhythm of the roar of the waves.”

.....
The SHX System and its scenes have been designed and tested by professionals and experts in special needs education, occupational therapists, psychologists and IT developers that specialize in usability and interaction.

What is SHX technology?

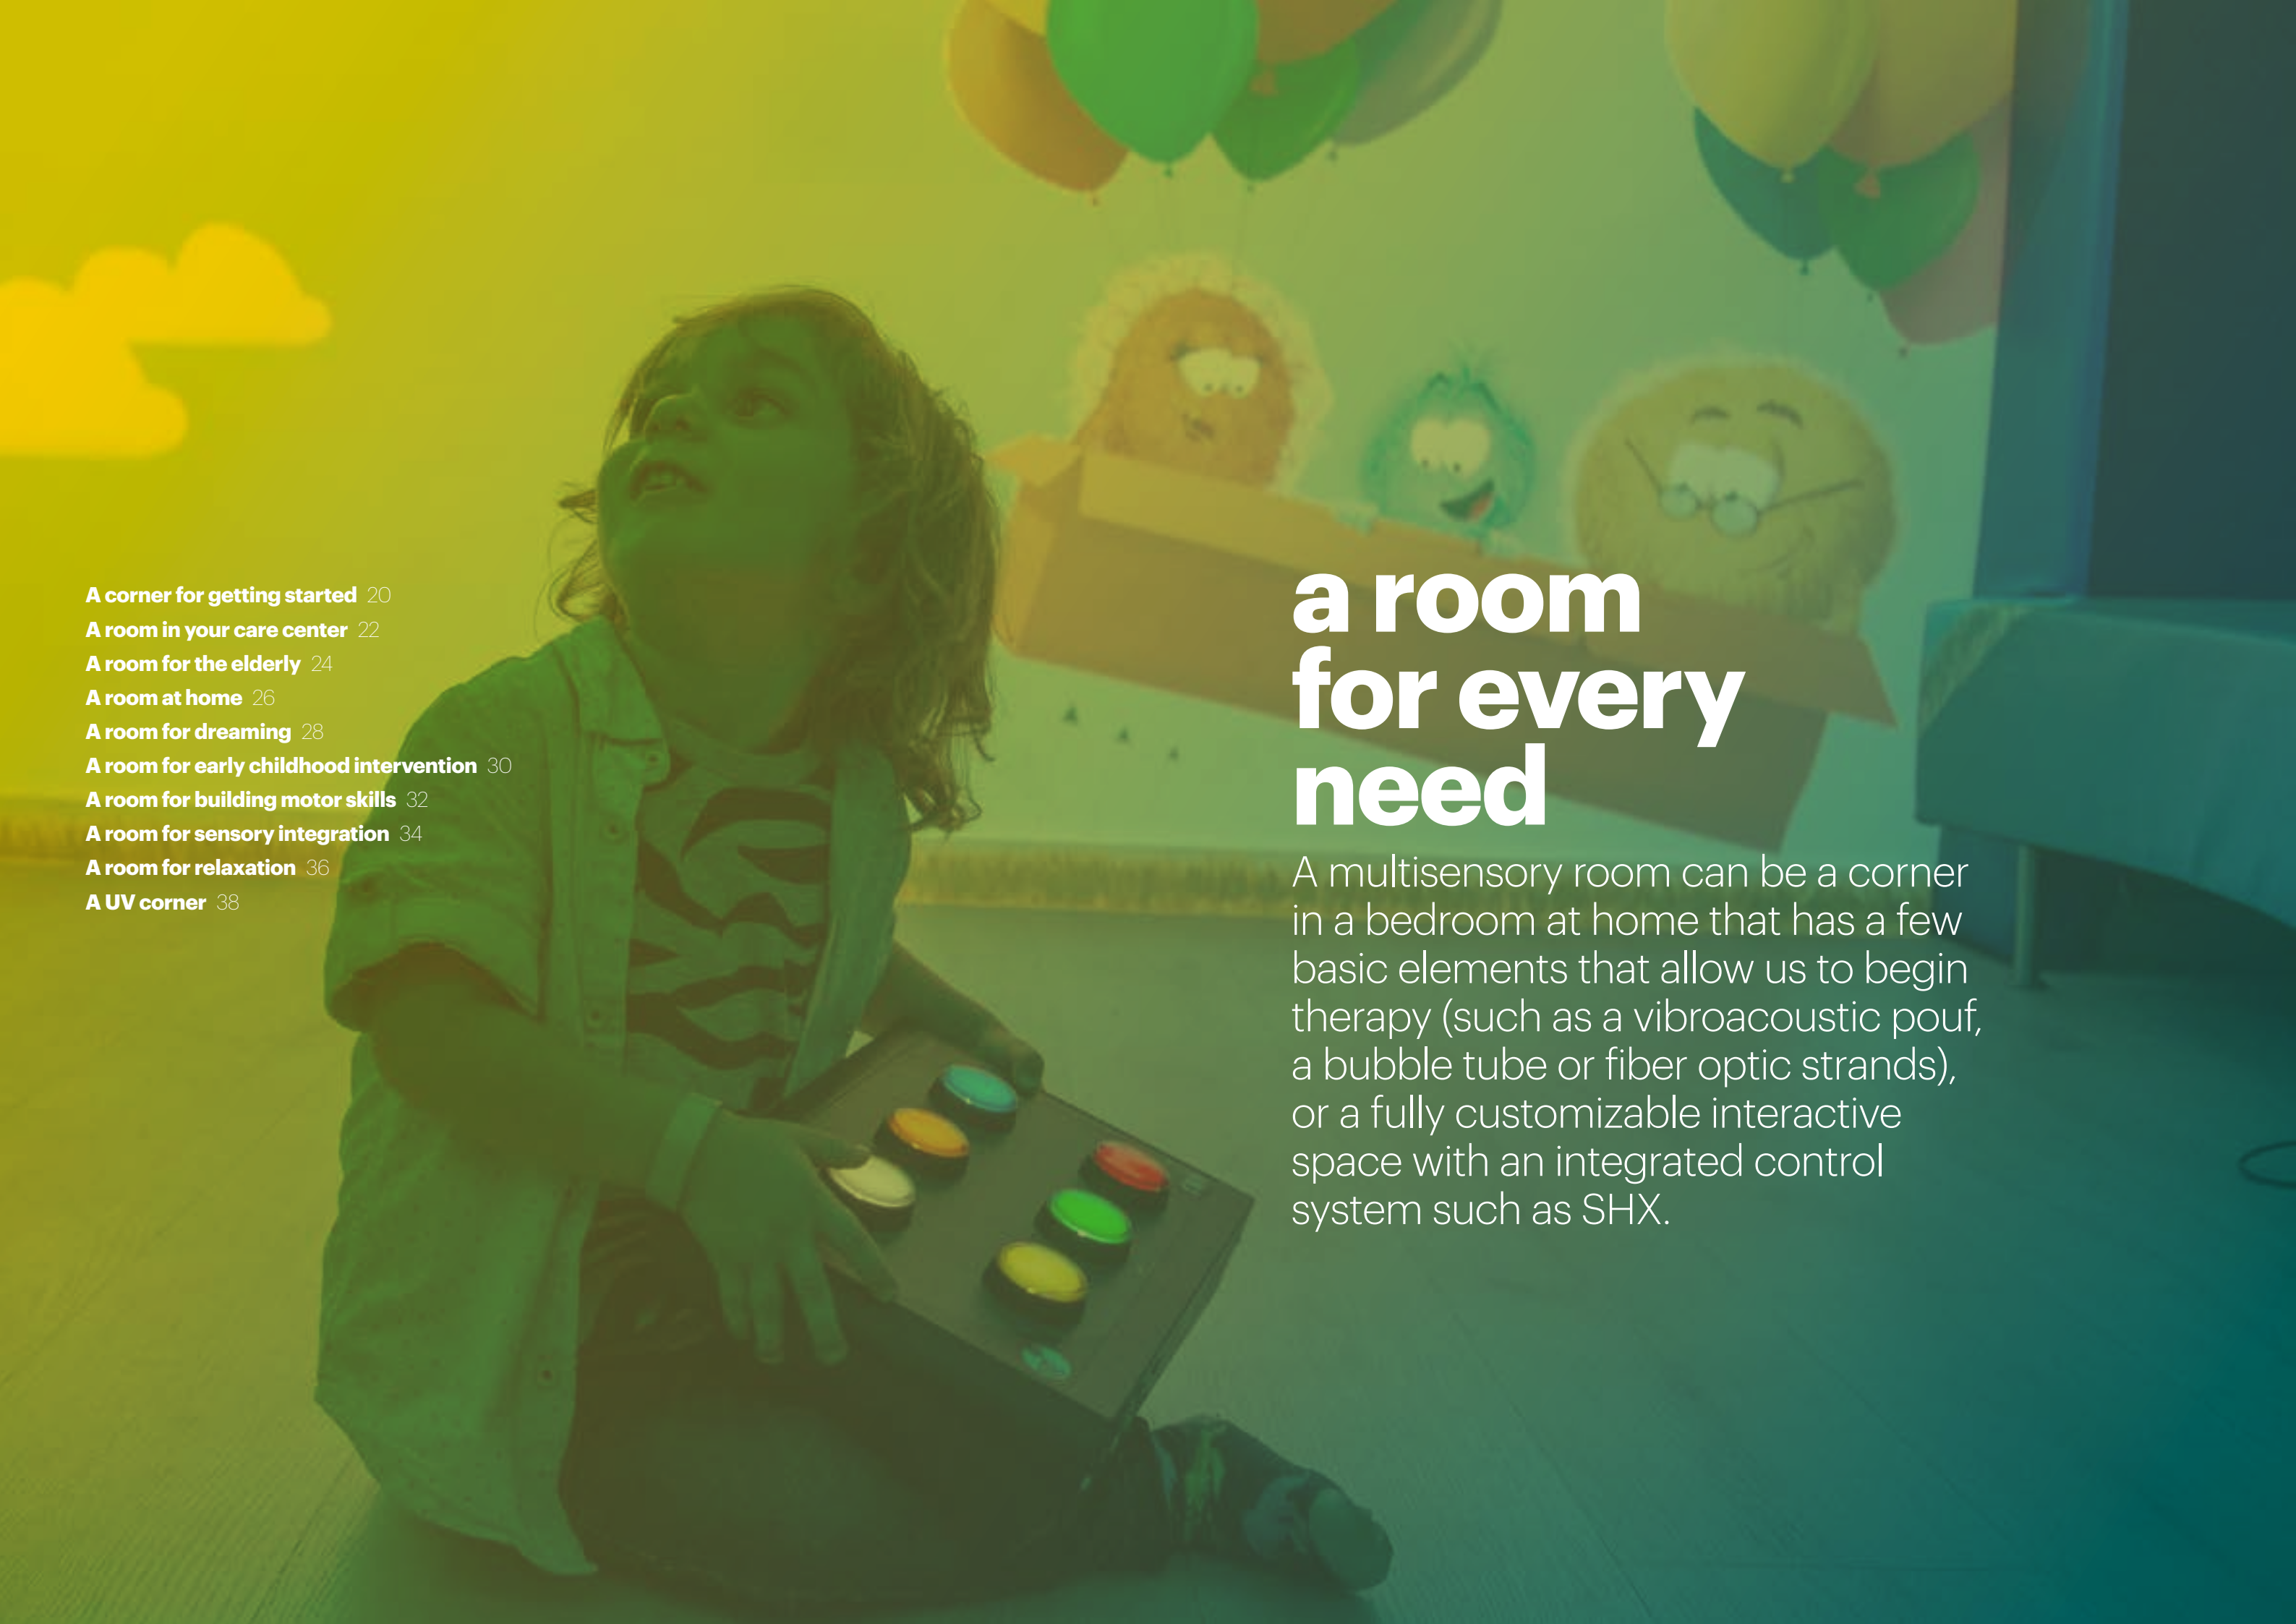

SHX is a unique technology developed by **BJLive!** for multisensory environments. It was designed to make sensory rooms even more immersive, interactive and customizable in order to provide greater therapeutic possibilities and create environments that can offer integrated stimulation as part of a tailored therapy program.

SHX sensory rooms

What sets the SHX Multisensory room apart from other other sensory rooms created without this technology is the fact that it works with “scenes” to allow videos and images to be projected at the same time as the different elements and effects in the room at the touch of a switch; its options for editing and customizing content; the wealth of default content developed by specialist therapists; and the numerous additional options for activating content.

The SHX System for multisensory rooms offers users and therapists the ability to take control of the room and the elements in it in a unique form of interaction.

A young child with curly hair is sitting on a wooden floor, looking up at a large, colorful projection on the wall. The projection shows a birthday cake with three cartoon faces on top and several balloons. The child is holding a black control panel with several colored buttons (yellow, orange, red, green, blue) and a small screen. The room is dimly lit, with the main light source being the projection on the wall.

a room for every need

A multisensory room can be a corner in a bedroom at home that has a few basic elements that allow us to begin therapy (such as a vibroacoustic pouf, a bubble tube or fiber optic strands), or a fully customizable interactive space with an integrated control system such as SHX.

A CORNER FOR GETTING STARTED

Discover the power of sensory stimulation and the benefits it offers in a small space or even just the corner of a room. A space for activating the senses, exploring and interacting. When you decide to expand the room and resources, the existing elements will still be useful.

✓ Opportunities...

- Self-awareness
- Absence/presence of stimuli
- Sensory discrimination
- Visual tracking
- Postural control
- Relaxation or Activation
- Understanding cause and effect
- Choice making
- Taking turns
- Joint attention
- Communication
- Memory

Use it for numerous activities with different therapeutic aims

a room for every need...

A ROOM IN YOUR CARE CENTER

Dive into SHX sensory rooms for a truly immersive experience! Simultaneously control the room and the various elements in it at the touch of a switch while you discover a unique form of interaction. Every SHX room can be adapted to suit every different need by allowing any content to be projected.

✓ Opportunities...

Environment control

Communication

Personal autonomy

Developmental support

Memory stimulation

Leisure and well-being

Emotional and behavioral control

Individual or group intervention

Stimulating the use of voice

Stimulating the senses

Sensory stories

Enveloping lights, bright images, sounds that vibrate...

Enjoy an experience you have never had before!

A ROOM FOR THE ELDERLY

**Interact,
find your
inspiration
and discover
limitless
excitement!**

Feelings, emotions and memories are marvelous tools for stimulating users and encouraging them to become more active while slowing their deterioration and improving their mood and state of mind.

✓ Opportunities...

Improving emotional and behavioral control

Intervention with memory and reminiscing

Slowing deterioration

Tailored cognitive and sensory stimulation

Well-being

Compensating the loss of mobility

Compensating sensory deficiencies

Alternatives: Cinema or dance hall

a room for every need...

A ROOM AT HOME

A unique, privileged space that can be customized to help you relax, have fun, feel and learn. Anything and everything is possible thanks to this user-friendly system that is easy to install at home.

✓ Opportunities...

Autonomous leisure

Behavioral control

**Decision making
based on personal well-being**

Sharing unique moments

**Learning to control
the surroundings**

Continuing therapy at home

Having fun!

Enjoy your
multisensory
space
at home too!

Add more effects
when you wish
to create a
more enriching
experience.
The possibilities
are endless...

A ROOM FOR DREAMING

An ideal space for going back to the essential and connect with oneself and the environment

Enter the world of sensory stimulation and let yourself be transported to a place of safety, calm and well-being. SHX rooms offer users a space in which sensory stimuli can be customized and controlled.

✓ Opportunities...

Helps to regulate behavior

Aids concentration and focus

Boosts attention sharing

Well-being and building a positive mindset

Ideal for forging interpersonal relationships

Identifying and working with feelings & emotions

A safe, cognitively accessible space

Activation-Relaxation Consciousness

The user receives sensory input in the most pleasant and easily comprehensible manner for him/her

A ROOM FOR EARLY CHILDHOOD INTERVENTION

The room can easily be adapted to every child in order to accompany them in developing their sensory, cognitive, motor and social skills

Young children learn by observing, exploring, feeling and listening to the world around them. That is why these sensory rooms are ideal for engaging their senses and creating opportunities for learning, interaction and play. They are so much fun!

✓ Opportunities...

Stimulating visual and auditory recognition

Taking turns

Recognizing objects and characteristics

Aids attention

Identifying feelings and emotions

Encourages communication and interaction

Symbolic play and make-believe to boost imagination

Miscellaneous activities: music, sensory stories, etc.

Look, listen, touch and do!

a room for every need...

A ROOM FOR BUILDING MOTOR SKILLS

Movement plays an essential role not only in a child's physical development but also in their mental, motor, social, emotional and artistic growth

A room that combines psychomotor activities with sensory stimulation enhances therapeutic work and boosts results and possibilities.

✓ Opportunities...

Developing gross and fine motor skills

Sensory motor stimulation

Environment encourages exploration and play

Boosts self-awareness

Construction of temporal and spatial schemes

Strengthening coordination and balance

Taking turns

Developing social skills

Leisure and activities

Climbing, crawling, jumping, swinging, interacting, feeling, adjusting and controlling... all in one room!

a room for every need...

A ROOM FOR SENSORY INTEGRATION

Sensory integration plays a vital role in improving motor skills and personal autonomy

We can offer you a customized sensory integration room that includes specific tools for vestibular, proprioceptive and tactile stimulation in order to help organize the nervous system, enhance body awareness and boost general development.

✓ Opportunities...

Sensory integration therapy

Simple to complex vestibular stimuli

Proprioception and body awareness

Encourages the development of touch

Combining different tools

Fun & games

Sensory experiences

Planning actions

A ROOM FOR RELAXATION

With the right mix of sensory aids, it is easy to create a safe, secure environment in which to guide users towards a state of calm and ensure that the subsequent intervention is smooth and pleasant.

The user remains safe, avoiding harm to himself or his environment, and he can achieve a state of calm from which he can reconnect

✓ Opportunities...

Reducing agitation

Protect the user and their surroundings

Accompanying the user as they calm down

Preventing disruptive behavior

Avoiding the idea of a “punishment” room

Ideal for intervention

Prevent the escalation of aggression

Color therapy

A UV CORNER

There are hundreds of activities waiting to be discovered!

Open the door to a multisensory world with an ultraviolet corner or area in your sensory space. When the lights go out, the darkness reveals a universe of mysteries and objects that only shine in this corner.

✓ Opportunities...

Aids concentration and focus

Teaching object permanence

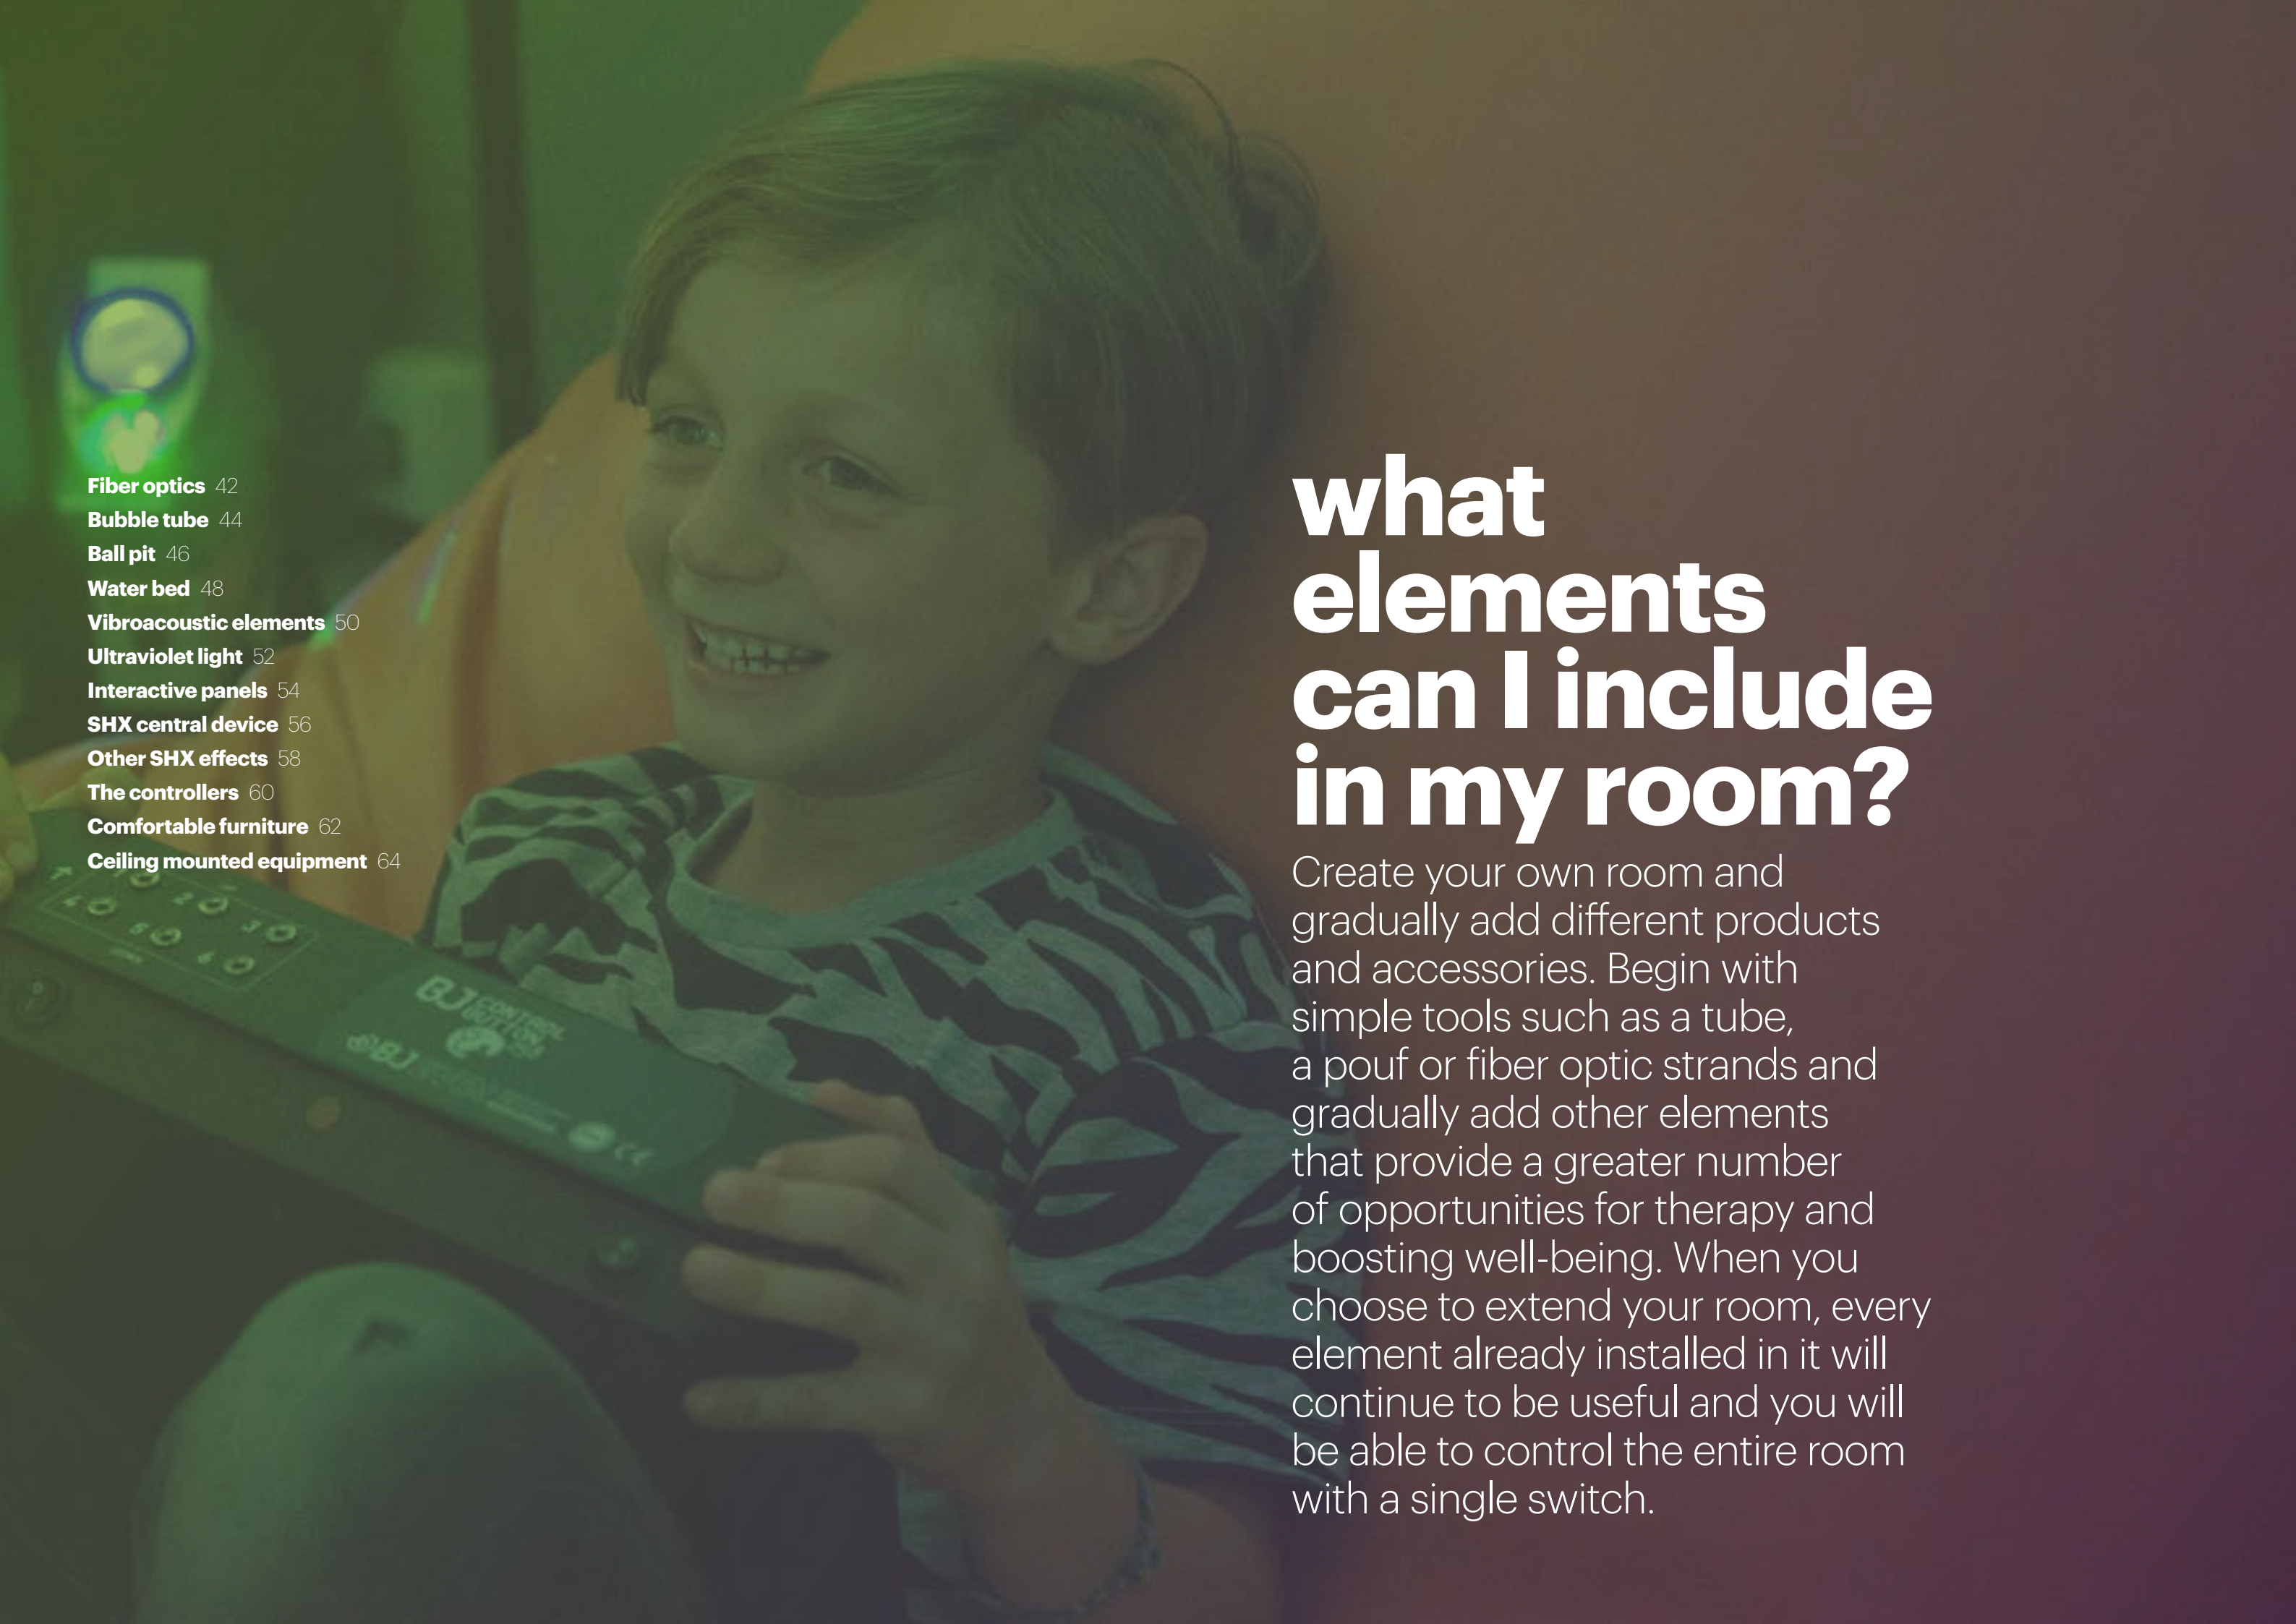

Visual tracking of an eye-catching object

Recognizing the body (using reflective gloves, outfits or cloths)

Miscellaneous activities: drawing, tracing ...

Identifying simple shapes, letters or numbers

what elements can I include in my room?

Create your own room and gradually add different products and accessories. Begin with simple tools such as a tube, a pouf or fiber optic strands and gradually add other elements that provide a greater number of opportunities for therapy and boosting well-being. When you choose to extend your room, every element already installed in it will continue to be useful and you will be able to control the entire room with a single switch.

what elements can I include in my room?

FIBER OPTICS

Fiber optics strands are a fascinating visual and tactile stimulus that provide a unique opportunity to touch and play with light. The SHX System allows them to be adjusted using several different controllers or coordinated with the rest of the elements in the room.

Other formats of fiber optic elements:
Curtain, fountain and starry sky.

Caress, touch, feel and play with these bright, colorful light effects in a unique and safe way

Ideal for...

- Cause-effect**
- Attention and focus**
- Fine motor skills**
- Self-awareness**
- Election**
- Memory**
- Taking turns**
- Pretend play**
- Association**
- Communication**
- Social skills**

Choose how you control the fiber optics!

Use your favorite controller to make understanding cause and effect even more exciting!

what elements can I include in my room?

BALL PIT

Dive into the magical fun of a pit full of balls that change color. Allow yourself to be surrounded by and wrapped in colored light while you play and learn without realizing it. Ball pits are ideal for stimulating proprioception, self-awareness and movement.

Make your pit vibroacoustic!
A pit that vibrates to the rhythm of sounds and music is a fantastic immersive resource.

This pit or pool also offers hundreds of extra activities thanks to the luminous balls it contains and that can be controlled in several different ways or synchronized with the rest of the room.

**Because...
who doesn't
like ball pits?**

Ideal for...

Proprioception and self-awareness

Relaxation

Identifying personal/spatial boundaries

Visual-motor coordination

Play

Movement

Visual tracking

Joint attention

Choice making

Social skills and interaction

Choose how you control the ball pit!

Control and change the colors in the pit using the numerous different controllers (see Page 60) or synchronize them with the rest of the elements and effects in the room thanks to the SHX System.

what elements can I include in my room?

SHX CENTRAL DEVICE

Control your sensory room like never before! Now you can control the user's level of interaction and stimulation, add your own videos and images, let your imagination fly and convert your room into a unique, customized space in which the user is the center of attention.

Dive into the most immersive sensory! experience!

Install the SHX System and watch your room fill with inspiration and light!

Convert your current sensory room into an SHX Multisensory room with the SHX Central Device. Ask us how! info@bjliveat.com

The SHX Central Device features:

The central device for the electronic control of the entire room, a sound system and loudspeakers, a vibration amplifier that gives any element vibroacoustic properties, a projector, a tablet with SHX software that can be used to control the room and also features projectable scenes and suggested content for including in therapy sessions.

Your room will become a fully themed environment full of light and color at the touch of a button

Features & benefits

Project any video or image on one or two surfaces/screens

Control the sensory elements in the room with multiple different devices (see controllers on Page 60)

Control all sensory elements simultaneously. Change everything with the press of a button!

Enjoy more than 300 pre-installed units of software content (colors, fruit, scenes, seasons, stories, places in the world, feelings and emotions...)

Regular access to new and unique content and accessories

Add your own content (USB devices or YouTube videos) for even more personalized activities

Program different effects (soap bubbles, fan, stars, etc.) to activate as and when desired

Sequential, shuffle or scan access

Control the room with any real object, throwing a die, pressing a switch, or even with your eyes

Control the level of interaction and stimulation and find creative and motivating ways of participation

what elements can I include in my room?

OTHER SHX EFFECTS

In addition to images, videos, lighting effects, a bubble tube, music and sounds, you will also be able to enjoy other effects such as the wind, soap bubbles, snow and stars, among others, which make the experience in the sensory room even more immersive.

SHX bubbles:
Your own
bubble machine

SHX Fan:
Feel the breeze
in your face

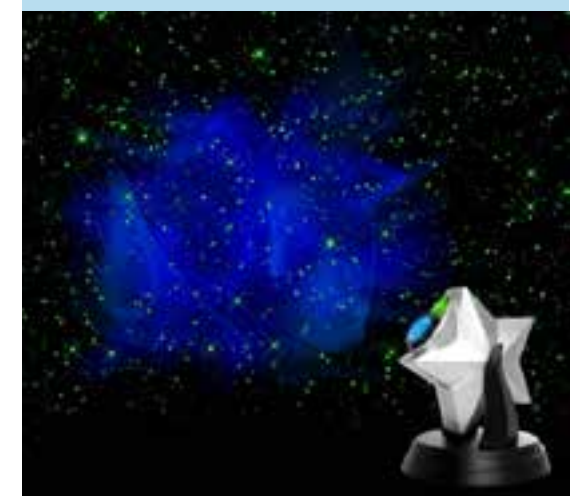

Fireball:
A disco effect
in your own home

Transport your senses to Niagara Falls and feel the wind caress your face while vibrations run through your body and you are surrounded by bubbles. This immersive experience will make you feel as though you are really there. Where would you like to travel to...?

Activate
all the effects
and projections at
the same time and
control your sensory
elements and
devices with a
single button!

Laser Star Projector:
Transform the sensory room
into an entire galaxy

Every effect comes to life at the same time to create the ultimate immersive experience!

THE CONTROLLERS

Take control of the room! Select the controller that best suits your users' needs and allow them to be the main character in every story.

A user's ability to interact with their environment allows them to play a more significant role in the space and activity. This has a positive impact on the therapy program and its success.

Select your favorite switch for activating different sensory elements to configure them to suit your therapeutic goals

Control and adjust the colors of the luminous elements

You will be able to easily control the lighting devices individually without the need for an additional device (SHX Central Device or any other). Simply activate the controller and watch the light change color. Ideal for activities that center on understanding cause and effect, choice making, communication, specific learning and leisure.

Control them with:

- 6 button control
- Giant Die
- Several switches
- Downloadable App for Smartphone and Tablet

The SHX Central Device offers countless possibilities

When you add an SHX Central Device to your sensory space, therapists and users will be able to control the entire room at the same time as though it were one single element. This way, they can be completely immersed in a themed world at the touch of a button. The entire room will change to become anything you wish, activating elements and effects at the same time to transport your senses anywhere you choose.

The SHX Central Device allows you to control the room in many different ways beyond individual controllers. Control the room using:

- Any Android or iOS tablet (several at the same time)
- Any Windows computer (touch screen, mouse, scanning and eye-controlled access)
- An interactive panel
- The microphone (voice volume or spoken orders. (Voice Kit)
- SHX Mat
- SHX Proximity

SHX Voice Kit:
Microphone that converts voice into colours or vibration

Switch

Giant Die

6 button control

SHX Tablet

Alfombra SHX

SHX PROXIMITY Control the room with real objects!

The sensory environment can be altered using any real object.

Simply select an item, place a sticker on it and move it towards the Proximity platform.... Watch your room fill with inspiration and light thanks to the lighting devices, sounds, images and vibration that transport you to a themed environment related to the object.

Ideal for working on cause and effect, interaction, attention and focus, language, etc.

A controller unlike anything you have ever seen!

Discover more about
SHX Proximity

what elements can I include in my room?

COMFORTABLE FURNITURE

Physical comfort, the correct posture and activation levels that are adjusted to the activity being undertaken are key to well-being and the success of any educational or therapeutic intervention.

You can purchase various elements and combine them according to specific needs or the activity planned. Our furniture is robust and can be adapted to any space.

Ideal for...

- Vestibular stimulation
- Vibratory stimulation
- Proprioception
- Motor stimulation
- Comfort and relaxation

These furniture items are safe and ergonomic. Designed to adapt to every need, they provide a high level of comfort and relaxation

Make your furniture vibroacoustic!
If you would like your furniture to vibrate in time to music, voices or the soundtrack on any video let us know and we will tell you how to adapt it.
info@bjliveat.com

Begin with the basics and expand your sensory room gradually!

what elements can I include in my room?

CEILING MOUNTED EQUIPMENT

Ceiling mounted equipment in your sensory room allows you to work on gross motor skills and provide the user with vestibular and proprioceptive stimulation. This type of therapy helps to build and organize body awareness by strengthening spatial orientation, movement planning and the ability to maintain balance and posture.

The use of vestibular material in sensory rooms and other spaces is ideal for sensory integration work and other types of intervention

The vestibular system provides our sense of balance and information about our body's movement and position

👍 Ideal for...

- Vestibular stimulation
- Vibratory stimulation
- Motor response
- Temporal schemes and rythm
- Interaction
- Proprioception
- Activation Consciousness
- Relaxation

Vestibular stimulation promotes psychomotor skills such as coordination, balance and fundamental motor skills. It is also a powerful tool for modifying muscle tone, regulating and improving alertness and mood, or connecting with emotions.
