

# BJ-EEXX Acrylic Mirrors

## Instructions manual

### 1\_Description

Acrylic mirrors are special plastic mirrors used for **reflecting** bubble tubes and other elements in a multisensory room.

They are specially **designed to be safe and durable** under demanding environments.

The plastic material helps preventing breakage and accidents.

They are reinforced with a **wooden panel** to prevent warping and to ensure durability.

The **edges are coated** with a plastic material to avoid cuts and improve aesthetics.

They are **easy to install** without protruding from the wall.

Available in different sizes and shapes.

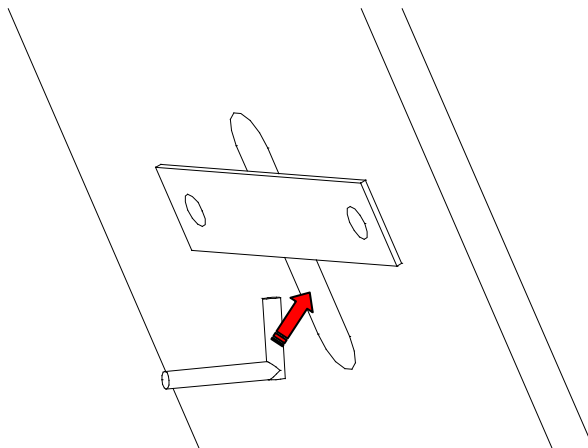

### 2\_ Installation

#### Tools:

- Drill and 6 mm bit
- 2 anchors (number 6)
- 2 Screws
- Pencil
- Tape measure
- Level

#### Installation:

1. Locate the mirror and level up.
2. Mark the holes.
3. Drilling, introduce the anchor and tighten the screws.
4. Hang the mirror as shown in picture below

### 3\_Cleaning

1. Use a soft clean cotton or wool cloth to remove solid debris attached to the mirror before cleaning the mirror.
2. Use a very soft clean cloth slightly moistened in mild soap. Repeatedly rinse the cloth to remove any dust that may be on the cloth.
3. Dry with a soft dry cloth. Avoid rubbing vigorously because it may scratch the mirror.

#### IMPORTANT:

- Do not use abrasive products or products for cleaning windows or kitchen.
- Do not use cloths or anything that may scratch the mirror surface.
