

Enabler Socket+

BJ-234 (Also: BJ-234-UK/AU/US)

Turn on/off your household appliances or adapted devices

Enabler Socket+ is a **"Plug and Play"** receiver with a switch relay contact that allows you to turn on/off different elements of your environment in a simple way: heaters, lamps, kitchen appliances... as well as devices that can be switched adapted like toys, phones, small apparatus working with batteries, etc.

Activate it with any of [our controllers](#) or by means of an external switch.

Choose from **three operating modes**: ON/OFF, latched and timed.

This device is part of our [environmental control](#) solution.

- This product is available for: EU (BJ-234), UK (BJ-234-UK), Australia (BJ-234-AU) and USA (BJ-234-US).
- Supply voltage: 230VAC.
