

## Small Leaf Chair

### BJ-EVBFP

Fetal position, sway, proprioception and welfare. Up to 12 kg.

This bag is hung from the ceiling. When the users sit in it, they adopt a fetal position and are wrapped in material, allowing them to swing safely.

Designed for use both at home and in hospitals, nurseries, schools and multisensory rooms, the leaf chair provides multiple **benefits in vestibular and proprioception areas**. It also helps to **regulate emotions**, providing a great sense of security and calm.

Size suitable for people who weigh **up to 12 kg**.

#### Benefits:

- Extensive contact with the bag
- Opportunity to feel the body's limits
- Opportunity to detect volume and weight

#### Movement:

- Vestibular stimulation: forwards/backwards, side to side and spinning
- Boosts visual coordination and activation
- Enhances spatial awareness
- Rhythm, connection to our surroundings
- Strengthens balance

#### Fetal position:

- reminiscent of the womb. Emotional benefits
- Elimination of gases (infant colic)
- Effect of hugging and holding
- Reduces muscle tension
- The back is stretched

#### Postural changes:

- Prevention of ulcers and bedsores
- Effective rest

Emotional regulation:

- Safety and calm
- Relaxation of the body
- Attention adjustment.
