

Control Pro

BJ-256

Control up to 112 household devices in an accessible manner

Thanks to its **infrared learning system** you can control any device that works using a remote control.

With the appropiate accessories you can **control also other elements** like doors, lights, beds, ceiling hoists, blinds, electrical appliances, alert systems, etc.

- Access as it suits you better: using the **keypad** on the remote control or with a single external switch by scanning.
- **Customize the function** that performs each key according to your needs.
- Control **all you want**, you have 112 different functions.
- **Memorize** the functions of **any IR remote controller** (TV, air conditioning, HiFi, etc.)
- With the **radio frequency system**, control the elements overcoming obstacles and walls; no need to aim.
- **Easy** to hang around the neck and attach to a wheelchair.
- Ergonomic keypad with a configurable **anti-shake** system.
- **Customize your covers** with your favourite images by means of the included program.
- Use the **mobile phone charger** to top the long-lasting battery up.
- Possibility of **macros**: a single button activates a sequence of actions.

This device is part of our environmental control solution.

Technical features:

- Number of keys: 15
- Number of programmemable functions per key: 8
- High luminosity LEDs.
- Removable cover.
- Long autonomy: 900 mAh Ion-lithium battery.
- Charge using a USB cable.
- Fixing to be able to hang the remote control.
- Radio Frequency: 433 MHz (ICM).
- Infrared Frequency: 38 kHz.
