Control Button

BJ-258

The simplified environmental control

Control Button allows you to **control household devices in the easiest way**.

The size of the buttons, the possibility to add symbols and the use with external switches **facilitates environmental control** for many people, especially **beginners** and those who need simple interfaces or are in a **multisensory environment**.

Control devices work with infrared directly like TV, stereo, air-conditioning, etc. and elements like doors, lifts, furniture, lights and typical elements of a multisensory room by means of the BJ System enablers.

This device is part of our environmental control solution.

Technical features:

- Number of buttons: 6
- Number of switch inputs: 6
- Number of programmemable functions per button/switch: 2
- ALong autonomy: 900 mAh Lithium Ion battery.
- Charge: Using a micro USB cable (included).
- Ergonomic design.
- Customizable labels for the buttons
- Radio Frequency: 433MHz (ICM).
- Infrared Frequency: 38 kHz.
- Size: 290 x 220 x 160 mm.
- Optional keyguard available.

Compatible with switch.
