

Vibroacoustic cushion

BJ-EMCV

Feel the vibration of the music or the video sounds running through your body

This fascinating cushion **vibrates to the rhythm of music, voices or the soundtrack of any video**, creating a striking but pleasant effect on its users. It needs the MyRoom! Center to function or must be used in a sensory room that uses the SHX System.

It can be hugged, placed on your lap, your back or other parts of the body to help the user build an emotional connection with them. It has an immersive effect when used in combination with other audiovisual elements, and boosts connection with people with other sensory impairments.

Measurements: 40 x 40 cm

Requires auxiliary equipment.
