

Environmental Control Training Kit

BJ-B14

Environmental control training kit consisting of 8 products

This Environment Control Learning Kit contains all the necessary elements to demonstrate, learn, practice and experience the control of the environment with our environment control solutions.

It is ideal for assessment centres, schools and any resource that aims to **increase the autonomy of people with disabilities**.

The solution offers a variety of controllable elements (lights, bed simulators, blinds, electrical appliances, toys, stereo...) as well as a wide range of methods to control them, including scanning solutions, using the computer, tablet or mobile phone.

Starting with the very simple control of a single element with a large push button to learning to control various elements and combinations.

The kit comprises the following components:

- 1x Environment control case, which shows the possibility of controlling a bed, an electrical appliance, an alarm, a light, blinds and a stereo

Controllers:

- 1x Control+
- 1x USB Control
- 1x 6 Control
- 1x Control Button
- 1x Control Pro

Accessories:

- 1x Fire Ball
- 1x Adapted Toy
