Enabler Core

BJ-239
The central device in the environmental control installations

Enabler Core is the core device in the environmental control installations integrating several elements centralized. It communicates with the other systems in the building such as climate control, nursing alarm system and home automation.

You can combine it with the products Enabler 4P and Enabler 12S.

This device is part of our environmental control solution.

- Power suply: 5VDC.
- Controllable remotely using our remotes or manually by means of wall switches.
- Size: 150 x 59 x 36 mm.
- Radio Frequency: 433 MHz.
- 6 low voltage relays
- 3 digital outputs (0-5V)
- 3 I/O analog inputs
- 3 digital inputs
- 2 UART ports to connect Control Touch and Enabler 4p y Enabler 12S
