

Control Touch

BJ-262

Control the environment from a digital screen

Control Touch is a remote for the **control of the environment** designed to work with an [Enabler Core](#) for a **complete control of the different elements in big buildings**, such as **hospitals, centres, nursing homes**, etc. and also in the **house**. The control from a digital screen which is easily installed and fitted into the wall makes it very easy and convenient for every place.

Control Touch integrates the **Application Control** which allows to **customize the interface for every specific user**.

This device is part of our [environmental control](#) solution.

Technical features:

- Connection with Enabler Core through cable UART included
- Wall frame included
- Control APP included
- Security System with password for configuration
