Luminea Bubble Tube

BJ-LTUB
Much more than a bubble tube

The **bubble tube** stands out in the darkness and captivates the attention of anyone near it with its light and movement. This bubble tube helps create innumerous atmospheres using its **colors**, **vibration**, **sound**, **reflections**, floating objects and interaction.

Interact with light as never before

Our **Luminea bubble tube** can be used along with a 6 button, a giant die (Sensory Cube), a colored mat (Sensory Step), the switch that you want, or even with the **Luminea App** (available for downloading) to control the colours of the tube in a unique way.

What makes this amazing App even more attractive is that it **allows the user to control one or several** Luminea devices and also **includes dozens of built-in activities**. The interactivity of the App helps us to achieve diverse therapeutic and/or educational objectives. Use the fun and creative activities we have provided or easily create your own activities with this App. It's limitless!

Multiply its possibilities

Besides being part of a small sensory room, **Luminea bubble tube** can also be part of the **SHX System** as part of a more complete **multisensory environment**, which multiplies the interactive possibilities within an integrated system that incorporates the remaining devices within the room, **including projection**, **sound**, vibration, etc. All the functionalities that the SHX system offers, such as **voice control**, **eye gazing**, use of various controllers including the SHX Mat, SHX Die, Button 6 and other access devices are also possible with our Luminea bubble tube.

Find out more about **SHX Sensory Rooms** and the authentic immersive experience by clicking here.

You won't be able to stop looking at it!

The Luminea bubble tube also has a special mode called "sporadic bubble" which produces a singular, large bubble which gradually

moves to the top of the tube. This is ideal for users who require focusing on activities related to attention building and visual tracking. Add the ball kit to multiply the visual impact.

A pleasantly striking stimulus which will keep the user enthralled.

➤ Download now our Multisensory Catalogue and discover sensory rooms as you never imagined.

Useful for...

✔ Visual tracking

✔ Attention/focus

✔ Cause & effect

✔ Preferences/choices

✔ Memory

✔ Taking turns
