

Luminea Fiber Optics 2m/3m

BJ-LFIB2, BJ-LFIB3

Enjoy the pleasure of touching the colours

Changes of color in the fibre optic strands boost the user's **attention and focus.** Contact with the optical fibres helps us to perceive different parts of **our body**.

Ideal for learning **cause and effect**, recognizing **colors** and activities that encourage **communication**. Thanks to **LED** technology, the fibre optics **shine brightly** through the strand in a **broad range of bright colors**.

Available in 2 metres or 3 metres.

Interact with light as never before

Our **Luminea fiber** can be used along with a 6 button, a giant die (Sensory Cube), a colored mat (Sensory Step), the switch that you want, or even with the Luminea App (available for downloading) to control the colours of the fiber in a unique way.

What makes this amazing App even more attractive is that it **allows the user to control one or several** Luminea devices and also includes dozens of built-in activities. The interactivity of the App helps us to achieve diverse **therapeutic and/or educational objectives.** Use the fun and creative activities we have provided or easily create your own activities with this App. It's limitless!

Multiply its possibilities

Besides being part of a small sensory room, Luminea optic fiber can also be **part of the SHX System** as part of a more complete multisensory environment, which multiplies the interactive possibilities within an integrated system that incorporates the remaining devices within the room, including projection, sound, etc. All the functionalities that the SHX system offers, such as voice control, eye gazing, use of various controllers including the SHX Mat, SHX Die, Button 6 and other access devices are also possible with our Luminea fiber.

Find out more about **SHX Sensory Rooms** and the authentic immersive experience by **clicking** here.

➤ Download now our Multisensory Catalogue and discover sensory rooms as you never imagined.
