

Luminea Led Line (Ceiling)

BJ-LLLT

Enlighten your room and play with light

LED strip lights allow you to create **colored environments by changing the color of the entire room**. This way, you can increase the impact of the projections and the colors of the room's therapeutic elements.

Installing LED strip lights behind the protective panels provides an ambient lighting effect that is perfectly integrated into the room's furniture and follows the edges of the paneled walls.

Interact with light as never before

Our **Luminea led line can be used along with a** 6 button**, a** giant die **(Sensory Cube), a** colored mat **(Sensory Step),** the switch that you want, or even with the **Luminea App** (available for downloading) to control the colours of the leds in a unique way.

What makes this amazing App even more attractive is that it **allows the user to control one or several** Luminea devices and also **includes dozens of built-in activities**. The interactivity of the App helps us to achieve diverse therapeutic and/or educational objectives. Use the fun and creative activities we have provided or easily create your own activities with this App. It’s limitless!

Multiply its possibilities

Besides being part of a small sensory room, **Luminea led line** can also be part of the **SHX System** as part of a more complete **multisensory environment**, which multiplies the interactive possibilities within an integrated system that incorporates the remaining devices within the room, **including projection**, **sound**, vibration, etc. All the functionalities that the SHX system offers, such as **voice control**, **eye gazing**, use of various controllers including the SHX Mat, SHX Die, Button 6 and other access devices are also possible with our Luminea led line.
