

Lumineia Corner

BJ-LRIN23

A sensory space wherever you want

Lumineia corner allows you to have **a little multisensory space** full of therapeutic opportunities in a **plug & play** and **very easy to use** corner.

If you don't have a [multisensory room](#) with [SHX technology](#) yet or a big room with many elements and totally immersive, you can **start by a little corner** which will allow you anyway to **create your little interactive world** and take advantage of the multiple benefits that these rooms provide.

This versatile kit is designed for covering the maximum of therapeutic possibilities, educative and leisure, including the lighting sensory elements par excellence with regards to regulation of the senses: the bubble tube and the fiber optics.

The lighting devices included in this kit belong to our range of sensory lighting devices called [Lumineia](#), which means **more control and interaction possibilities for the user** and more resources for the intervention.

All the elements of this kit can be taken to a more complex room since **they are compatible with all our devices and controllers**. It is **also compatible with the [SHX System](#)**, the most immersive technology for sensory environments.

This kit is easy to mount, just **plug and play**, and very **versatile** too, full of **therapeutic opportunities**. It is interactive and **user-controlled**, and **scalable**, since it allows you to add elements to your room and is still compatible with all the other devices and the [SHX System](#). You can benefit from the book of activities included with lots of **therapeutic ideas** for the intervention in your room.

The kit includes

- [Lumineia Bubble Tube](#)

- [Lumineia Fiber Optic 2m](#)
- [Lumineia Tablet](#) (already pre-configured)
- [Lumineia App](#) for Android (downloadable in several devices)
- [Square base for bubble tube and fibre optics](#)
- Access Point
- Wall brackets

When you want to expand your room, you will be able to **add as many devices as you want** and **combine them with the other elements** of the room to **make them work either individually or in a coordinate way**.

Take over!

This kit allows **the user to take control of the light** with the controller he prefers, so that he does not only look and feel, but also act and **experiences the cause-effect in first person**.

You can control the lighting devices of this kit from different controllers which will boost the therapeutic possibilities in your room:

- ✓ Change the colors of the tube and the fiber optics **with the [Lumineia App](#)**.
- ✓ Use our [6 button control](#) to change light at the touch of a button.
- ✓ Control the bubble tube rolling a giant die ([Sensory Cube](#)), or stepping on a colored mat ([Sensory Step](#)).
- ✓ Become the leader of light by controlling the colors **from a [switch](#)**.
- ✓ Play the **automatic mode** and enjoy the dance of the colors.

Lumineia's App

Download it and start using it! [Lumineia's App](#) is easy to use and works with all our lighting devices. It **includes multiple games and activities**, and also **allows you to create your own customized activities**. Besides, you can control light with a photo and **upload your own pictures and make them your personal controller**. (When you touch a red object in the photo, the devices will turn into red).

Accessories

Complement your room with other elements or accessories for sensory environments and get little by little a multifaceted and more immersive space.

Add to your room a funny [ball pool](#) that you can enlighten by pushing one of the four buttons at the sides, or control from any of the controllers mentioned above. You can also add accessories such as [mirrors](#) for an intervention with image or make your space bigger; a [water bed](#); or other Luminea lighted devices such as the [starry sky](#); a [lighted lamp](#); a [blue planet](#); a [fiber optics fountain](#), or [led lights](#) on the walls. Also, **remember to add the [ball kit for bubble tube](#)** with your Luminea bubble tube.

You can also choose to have the [SHX technology](#) and make your room limitless. All the elements of this kit will be useful later for an SHX room.

Ideas of Activities with Luminea

The Luminea corner comes with a **book with ideas of activities**, designed by expert therapists, to initiate an intervention. [Download now](#) the demo of the book.

These activities suggest **objectives to make the acquisition of learnings easier** by following the psychomotor development. The ideas of this guide are **useful with different users: typical development children**; children at an **early stage** who need to strengthen learnings; **people with a disability or special needs**, people going through **degenerative processes** and **the elderly**, since we activate preserved skills in order to slower deterioration.

Download now our [Multisensory Catalogue](#) in order to find out more about these lighting devices and see examples of sensory environments.
