

Sensory Step

BJ-EMSST

iChange the room with your feet!

Sensory Step is a **wireless colored mat** that allows you to **control your multi-sensory room** and all the light devices you have in it, both **individually** (one by one) or in combination (**all at once**).

This mat serves both to **control all our light devices** ([Luminea](#)) individually, as well as to **change all the devices of the room at the same time**, including the audiovisual scenes included in the [SHX System](#). Being **wireless** makes it very easy to include it in your sensory room whenever you want as it does not require a complicated installation.

Change the colors of the light!

Change the colors of any of our light devices ([Luminea](#)) by stepping on this mat. Step on the yellow and change the colors of your bubble tube into yellow; jump on the red color and watch how everything turns into red... Complement it by playing with the [Luminea App](#).

When a user changes the colors of the tube, the fiber, or the entire **sensory room**, they feel the protagonists, participate more and have more fun. This element is ideal for the **educational** and **rehabilitative** functions in **sensory stimulation** in a more direct, close and active way.

Change the scenes in your SHX room!

Control your entire [SHX Room](#) with your feet. Step on one of the colored buttons on the rug and turn the entire room into a new themed environment. Shoot **images, videos, sound, vibration** and other immersive effects just by stepping on the mat. Choose one of the 6 content scenes from the **SHX collection** that you are currently

in and change it to your liking. **Users have more fun, participate, interact** and feel the protagonists of this immersive experience.

These activities favor: **Cause-effect**, joint attention, fine motor skills, proprioception, choice, memory, turn management, **symbolic play**, association, **communication, social skills**.

Find out more about **SHX Rooms** and the authentic immersive experience by clicking [here](#).

Find other ways to control your sensory room

You can **control the light devices individually** or your entire room with other controllers such as: a [6-button remote](#), [a giant die](#), the [switch](#) you prefer, the look, the voice, [any object you want](#), or download the [Lumineia App](#) for free to control the various elements.

Ask us for free design project!

You imagine and we create! Ask us for a **free design project** for a sensory room that adapts to your needs, available space and therapeutic goals. Send us your contact data and **one of our specialists will contact you to design a complimentary design project for you.**

- [SHX System Compatible](#)
- Compatible with [Lumineia](#)
- Simple setup:
 - On the back there is a button to indicate

which device is controlled

- A long press deactivates inputs
- Measurements: 97x 80 x 4cm

Materials

The vinyl materials we use in our products are designed to meet the strictest market requirements.

- Antimicrobial, antibacterial and antifungal protection.
- Abrasion resistant
- Resistant to human sweat and saliva, urine and blood.
- Total weight: 620 gr/m²
- Thickness: 0.5mm - 1 mm
- Complies with REACH regulation
- Fire-resistant: M2 classification
- Complies with EN71-3 toy safety
- Highly resistant to the sun
