

Sensory Cube

BJ-EMSC

Roll the die and change it all!

Sensory Cube is a **wireless colored die** that allows you to **control your multi-sensory room** and all the light devices you have in it, both **individually** (one by one) or in combination (**all at once**).

This die serves both to **control all our light devices (**Luminea**)** individually, as well as to **change all the devices of the room at the same time**, including the audiovisual scenes included in the SHX System. Being **wireless** makes it very easy to include it in your sensory room whenever you want as it does not require a complicated installation.

Change the colors of the light!

Change the colors of any of our light devices (Luminea) by rolling the die. If you roll the yellow, the colors of your bubble tube will change into yellow, and so on... Complement it by playing with the Luminea App.

When a user changes the colors of the tube, the fiber, or the entire **sensory room**, they feel the protagonists, participate more and have more fun. This element is ideal for the **educational** and **rehabilitative** functions in **sensory stimulation** in a more direct, close and active way.

Change the scenes in your SHX room!

Control your entire SHX Room **with a die**. Roll the dice and let it turn the roo into a new environment. Shoot **images**, **videos**, **sound**, **vibration** and other immersive effects that will surround you. Let the dice decide how the room is going to look like next. **Users have more fun, participate, interact** and feel the protagonists of this immersive experience.

These activities favor: **Cause-effect**, joint attention, fine motor skills, proprioception, choice, memory, turn management, **symbolic play**, association, **communication**, **social skills**.

Find out more about **SHX Rooms** and the authentic immersive experience by clicking here.

Find other ways to control your sensory room

You can **control the light devices individually** or your entire room with other controllers such as: a 6-button remote, a wireless mat, the switch you prefer, the look, the voice, any object you want, or download the Luminea App for free to control the various elements.

Ask us for free design project!

You imagine and we create! Ask us for a **free design project** for a sensory room that adapts to your needs, available space and therapeutic goals. Send us your contact data and **one of our specialists will contact you to design a complimentary design project for you**.

- SHX System Compatible
- Compatible with Luminea
- Simple setup:
    - On the back there is a button to indicate which device is controlled
    - A long press deactivates inputs
- Available sizes: 25 x 25 or 40 x 40 cm

Materials

The vinyl materials we use in our products are designed to meet the strictest market requirements.

- Antimicrobial, antibacterial and antifungal protection.
- Abrasion resistant.
- Resistant to human sweat and saliva, urine and blood.
- Total weight: 620 gr/m2
- Thickness: 0.5mm - 1 mm
- Complies with REACH regulation
- Fire-resistant: M2 classification
- Complies with EN71-3 toy safety.
- Highly resistant to the sun.

Foams

- All the foam we use in our products, both polyurethane and polyethylene, are standardized and comply with the strictest European technical and environmental regulations.
