

Sensory Cube

BJ-EMSC

Roll the die and change it all!

Sensory Cube is a **wireless colored die** that allows you to **control your multi-sensory room** and all the light devices you have in it, both **individually** (one by one) or in combination (**all at once**).

This die serves both to **control all our light devices** ([Lumineia](#)) individually, as well as to **change all the devices of the room at the same time**, including the audiovisual scenes included in the [SHX System](#). Being **wireless** makes it very easy to include it in your sensory room whenever you want as it does not require a complicated installation.

Change the colors of the light!

Change the colors of any of our light devices ([Lumineia](#)) by rolling the die. If you roll the yellow, the colors of your bubble tube will change into yellow, and so on... Complement it by playing with the [Lumineia App](#).

When a user changes the colors of the tube, the fiber, or the entire **sensory room**, they feel the protagonists, participate more and have more fun. This element is ideal for the **educational** and **rehabilitative** functions in **sensory stimulation** in a more direct, close and active way.

Change the scenes in your SHX room!

Control your entire [SHX Room](#) with a die. Roll the dice and let it turn the room into a new environment. Shoot **images, videos, sound, vibration** and other immersive effects that will surround you. Let the dice decide how the room is going to look like next. **Users have more fun, participate, interact** and feel the protagonists of this immersive experience.

These activities favor: **Cause-effect**, joint attention, fine motor skills, proprioception, choice, memory, turn management, **symbolic play**, association, **communication**, **social skills**.

Find out more about **SHX Rooms** and the authentic immersive experience by clicking [here](#).

Find other ways to control your sensory room

You can **control the light devices individually** or your entire room with other controllers such as: a [6-button remote](#), [a wireless mat](#), the [switch](#) you prefer, the look, the voice, [any object you want](#), or download the [Lumineia App](#) for free to control the various elements.

Ask us for free design project!

You imagine and we create! Ask us for a **free design project** for a sensory room that adapts to your needs, available space and therapeutic goals. Send us your contact data and **one of our specialists will contact you to design a complimentary design project for you.**

- SHX System Compatible
- Compatible with Lumineia
- Simple setup:
 - On the back there is a button to indicate which device is controlled
 - A long press deactivates inputs
- Available sizes: 25 x 25 or 40 x 40 cm

Materials

The vinyl materials we use in our products are designed to meet the strictest market requirements.

- Antimicrobial, antibacterial and antifungal protection.
- Abrasion resistant.
- Resistant to human sweat and saliva, urine and blood.
- Total weight: 620 gr/m²
- Thickness: 0.5mm - 1 mm
- Complies with REACH regulation
- Fire-resistant: M2 classification
- Complies with EN71-3 toy safety.
- Highly resistant to the sun.

Foams

- All the foam we use in our products, both polyurethane and polyethylene, are standardized and comply with the strictest European technical and environmental regulations.
