

Sensory Go Luminea

BJ-SGL

Multisensory stimulation anytime, anywhere

The Sensory Go Luminea offers a versatile multisensory experience, ideal for **transforming any space into a therapeutic and enriching environment**. It is a compact solution composed of a wheeled cart with shelves and a padded mirror, designed for easy portability. The sound amplifier with an integrated speaker and Bluetooth receiver allows for the creation of an **immersive auditory atmosphere**. It also features a 120 cm [bubble tube](#) and a 3-metre [fiber optic](#) strand, two versatile elements that create unique and accessible sensory experiences for any setting.

A vibration unit is built-in, allowing you to connect a vibroacoustic element, such as a [cushion](#), [pouf](#), [water bed](#), [seat](#), or another device that will vibrate in sync with the sounds and music.

To enjoy all the elements in an interactive and unique way, the **Sensory Go Luminea** cart comes with a tablet with the [Lumineia App](#) pre-installed, allowing you to **control and interact with the lighting elements**. This app includes a wide range of activities to interact with the [bubble tube](#) and the [fiber optic](#), and it also allows you to create and customize as many new activities as you want, providing a **unique and accessible sensory experience**, perfect for any therapeutic or stimulation environment.

Advantages

- **Portable:** move it as many times as you want. Compact design with wheels, easy to transport anywhere.
- **Plug-and-play setup:** just connect and use it instantly. Ready to use from the first day.
- **Compatible** with more elements: you can always add new sensory devices to enhance the experience and adapt it to the user's needs.
- With **extra space:** it has shelves to store additional sensory elements.
- **Safe and durable:** the electronic components are protected, ensuring safe use in any environment.
- Accessible and **easy to use:** from the tablet, you can intuitively select colors, environments, and lots of activities, easily controlled by everyone. The interface is user-friendly, and the control panel is simplified.

- **Scalable multisensory stimulation:** you can equip your multisensory cart with complementary elements, such as an ultraviolet light, a star projector, and even integrate it with the SHX system.
- App pre-installed and **ready to use:** you can also install the Luminea App on any smartphone and use the sensory cart with it.
- **Easy to clean and maintain:** high-quality materials designed for prolonged use and easy maintenance.
- Positive impact on **quality of life:** ideal for a wide variety of contexts to promote calm, well-being, learning, development, or leisure.

Interact with the light like never before...

The [Luminea App](#) allows you to control one or multiple Luminea devices and includes a variety of activities full of possibilities for interacting with the [bubble tube](#) and [fiber optic](#), making it ideal for therapeutic and educational intervention.

The App **includes activities and games** that let you interact with the lighting elements, allowing your users or students to take control. Additionally, you have the option to **customize everything**, record color sequences, and add as many personal or online photos as you like, making the sessions more personalized. There are no limits!
