

## Sensory Go Luminea Plus

### BJ-SGP

Multisensory stimulation anytime, anywhere

**The Sensory Go Luminea Plus** offers a versatile multisensory experience, ideal for **transforming any space into a therapeutic and enriching environment**. It is a compact solution composed of a wheeled cart with shelves and a padded mirror, designed for easy portability. The sound amplifier with an integrated speaker and Bluetooth receiver allows for the creation of an **immersive auditory atmosphere**. It also features a 120 cm [bubble tube](#) and a 3-metre [fiber optic](#) strand, two versatile elements that create unique and accessible sensory experiences for any setting.

This model offers many interaction options (touch with a finger, full hand, etc.). It allows you to change the colors of the [bubble tube](#) and the [fiber optic](#), creating different sensory environments with just a touch.

Additionally, it incorporates an ultraviolet light kit along with a [UV spotlight](#), perfect for discovering and enjoying UV sensory elements in the dark. To complete the experience, the Sensory Go Plus includes an [aromatherapy kit](#) with a diffuser and essential oils, providing olfactory stimulation that promotes relaxation or enhances the sensory experience.

## Vibration to the rhythm of music!

This multisensory cart offers a unique bodily experience, allowing sound to be felt in the body and fostering a connection with the environment. It includes a [vibroacoustic cushion](#), a highly versatile element and adaptable to various activities.

You can also connect other vibroacoustic elements, such as a [pouf](#), [water bed](#), or [seat](#), that will vibrate in sync with the sounds and music.

Designed for those seeking a more complete and adaptable solution, Sensory Go Plus is ideal for **therapeutic centers, schools, nursing homes, and other environments** where accessible sensory stimulation is needed.

## Advantages

- **Portable:** move it as many times as you want. Compact design with wheels, easy to transport anywhere.
  - **Plug-and-play setup:** just connect and use it instantly. Ready to use from the first minute.
  - **Compatible** with more elements: you can always add new sensory devices to enhance the experience and adapt it to the user's needs.
  - With **extra space:** it has shelves to store additional sensory elements.
- 
- **Safe and durable:** the electronic components are protected, ensuring safe use in any environment.
  - Accessible and **easy to use:** from the tablet, you can intuitively select colors, environments, and lots of activities, easily controlled by everyone. The interface is user-friendly, and the control panel is simplified.
  - **Scalable multisensory stimulation:** you can equip your multisensory cart with complementary elements, such as the star projector, and even integrate it with the SHX system.
  - App pre-installed and **ready to use:** you can also install the Luminea App on any smartphone and use the sensory cart with it.
  - **Easy to clean and maintain:** high-quality materials designed for prolonged use and easy maintenance.
  - Positive impact on **quality of life:** ideal for a wide variety of settings to promote calm, well-being, learning, development, or leisure.

## Interact with the light like never before...

The [Lumineia App](#) allows you to control one or multiple Luminea devices and includes a variety of activities full of possibilities for interacting with the [bubble tube](#) and the [fiber optic](#), making it ideal for therapeutic and educational intervention.

The App **includes activities and games** that let you interact with the lighting elements, allowing your users or students to take control. Additionally, you have the option to **customize everything**, record color sequences, and add as many personal or online photos as you like, making the sessions more personalized. There are no limits!

## Interact with the light!

With **Sensory Go Luminea Plus**, you can find multiple interaction options that adapt to each user. You can use images within the [Lumineia App](#), where the corresponding color appears when tapped, offer [button 6](#) to interact with colors through wider movements, or propose [button 1](#) when you want interaction with a single movement... the only limit is your imagination!

## Who is Sensory Go designed for?

Any of the Sensory Go carts ([Lumineia](#), Lumineia Plus, or [SHX](#)) transform the space into a personalized sensory experience. Add Sensory Go to your school, center, or even your home, and turn that space into an ideal place for learning, well-being, leisure, and relaxation, at any time.
