

Control 4 Plus

BJ-246-4

Take control of your environment easily and comfortably. With the Control 4 Plus, you can configure up to 7 functions: control doors, lights, blinds or the TV from a single remote.

Control 4 Plus is the most accessible and comfortable solution for taking control of your home.

It manages up to 7 functions in an integrated, convenient way—doors, blinds, lights, hoists or profiling beds; plus infrared devices such as TV, air conditioning, or music players.

This new generation of remotes (also available as Control 2 Plus and Control 6 Plus) features repeated-press detection, sequences (launching several actions with a single button), and an improved programming interface on the remote and through the Control Configurator app.

Configure the remote from the App

Connect, customize and save your favorite setup—**no codes, no complications**. The free Control Configurator app (available for Android 9 or later) lets you **configure the remote from your phone** using a **USB-C** cable, with a clear and accessible interface.

What you can do with the app:

- **Import the configuration** from your current remote, edit it and send it back to the device.
- **Create new configurations from scratch** for [Control 2 Plus](#), 4 Plus or [6 Plus](#).
- **Assign actions** to each button (radiofrequency, infrared, GewaLink, KNX, scene change...).
- **Save your configurations** in the app's library to reuse later or duplicate on another remote.
- **Adjust parameters** like debounce time or action sequences.

In just a few minutes, your remote will be ready to control doors, blinds, lights, or any infrared-based equipment.

Download the app on Google Play:

Create simple sequences for your routines

With Control 4 Plus, you can **automate actions and create personalised sequences** that make your daily life easier. This feature allows you to link several commands to a single button. For example, when pressing “leave home,” the remote can **turn off the lights, raise the blinds and open the door** consecutively.

You can also create simpler sequences, such as turning on the TV and selecting your favourite channel, or activating the hoist and adjusting the bed to a specific position. Everything can be programmed easily from the Control Configurator app—no codes or complex combinations needed.

- Number of slots: **4**
- Functions per slot: **2**
- Total functions: **up to 7** (one slot is used to switch functions for the others)
- Raised keys • Ergonomic design • Hanging clip
- **3.7 V - 400 mAh** Li-ion polymer battery
- **USB-C 2.0** for charging/data – minimum **1 A** charger
- RF: **433 MHz (ICM)**

- IR: **38 kHz, 56 kHz and 455 kHz**
- GewaLink **database** • Siemens IR-KNX **database**
- Dimensions: **82 × 50 × 16.5 mm**
