SAFETY DIRECTIONS FOR LASER TWILIGHT (NO. 5106)

CAUTION: Remember - Never look directly into The Laser Twilight.

The Laser Twilight has been designed for safe trouble free operation. For your protection, warning labels and product identification labels have been affixed on the Laser Twilight. These labels should not be removed.

CAUTION -

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous exposure.

Cleaning should be accomplished only with the power OFF.

To avoid possible hazardous radiation exposure, you should NEVER attempt to disassemble or service this product.

See Diagram A to find where the following labels can be found on your Laser Twilight.

Laser Technical Specification:

- **Beam Divergence : ≤ 1.5 mrad**
- **Time Duration of Laser Emitted : Continuous**

For home use only. This is not for stage use.

In an environment with electrostatic discharge your product may malfunction and may need to be reset. To reset the unit, simply unplug the jack for 1 minute and then replace it.
